

TIPS for centering clay

1. Start with a wedged ball of clay.
2. Throw clay down as close to the center of the bat as possible.
3. Use the palm of one hand on the side and the side of the other hand from the top. (karate chop)
4. Make the clay move with your hands, not your hands with the clay. You're in charge!
5. Practice, practice, practice! This is a learned skill.
